SUMMARY

Backend engineer with 3 years of experience building and scaling REST APIs for fintech and e-commerce products. Strong in Node.js, TypeScript and PostgreSQL, with hands-on work on caching, background jobs and API performance. Looking for a role where I can design reliable, high-throughput distributed services.

EXPERIENCE

Backend Engineer | PayLoop Technologies, Pune | Jun 2023 - Present

- Designed and shipped a payments reconciliation service in Node.js and PostgreSQL that processes 1.2 million transactions per day with 99.95% uptime.
- Reduced p95 API latency from 820 ms to 240 ms (71% faster) by adding query indexes, connection pooling and response caching.
- Built an idempotent webhook processor with retry and dead-letter handling, cutting duplicate payouts by 98% and saving about $45,000 per year in manual refunds.
- Introduced rate limiting and request validation across 40+ endpoints, blocking roughly 15,000 abusive requests per day.
- Led migration of 12 REST services to TypeScript and added contract tests, lowering production bugs by 35% within two quarters.
- Mentored 2 junior engineers and ran weekly code reviews for a team of 6.

Software Engineering Intern | ShopSphere Retail, Mumbai | Jan 2023 - May 2023

- Implemented a product search API with pagination and filters that served 50,000 queries per day.
- Wrote 120+ unit and integration tests with Jest, raising coverage from 48% to 82%.
- Automated deployments with GitHub Actions and Docker, reducing release time from 40 minutes to 12 minutes.

PROJECTS

URL Shortener with Analytics | Personal project | 2024

- Built a URL shortening service handling 500 requests per second in load tests (k6) using Node.js, PostgreSQL and in-memory caching.
- Added click analytics, expiry rules and API keys; deployed on AWS EC2 behind Nginx.

Task Queue Library | Open source | 2023

- Created a small job queue with retries, exponential backoff and scheduled jobs; 180 GitHub stars and 6 external contributors.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Backend: Node.js, Express, NestJS, REST APIs, WebSockets, JWT authentication

Databases: PostgreSQL, MongoDB

Cloud and DevOps: AWS (EC2, S3, RDS), Docker, GitHub Actions, Nginx, Linux

Testing and tools: Jest, Supertest, k6, Postman, Git

Frontend (basic): React, HTML, CSS

EDUCATION

B.E. in Computer Engineering | Savitribai Phule Pune University | 2019 - 2023

- CGPA 8.4 / 10. Coursework: Data Structures, Operating Systems, Databases, Computer Networks.

CERTIFICATIONS

AWS Certified Cloud Practitioner (2024)

Meta Back-End Developer Professional Certificate (2023)
